

Privacy Policy for Solar Wiki iOS App

This Privacy Policy describes how the Solar Wiki app collects, uses, processes, and shares user information. The Solar Wiki app is intended for iOS platform users and is designed to provide information about the solar system and allow the user to view planets in augmented reality. The app does not collect any user data and does not record the camera.

Information Collection

The Solar Wiki app does not collect any personal information from the user. The app does not request or store information such as name, address, email address, phone number, or payment information. The app does not collect user location information.

Information Use

The Solar Wiki app does not use any personal information from the user. The app is designed solely to provide information about the solar system and allow the user to view planets in augmented reality.

Camera Permission

The Solar Wiki app requests permission to access the user's device camera, but only to view augmented reality content. The app does not record or store images or videos captured by the user's camera. All images that are displayed on the app screen are generated in real-time using augmented reality technology and are not stored or shared with third parties. The purpose of using the camera is to provide an immersive and interactive experience for the user, allowing them to explore the solar system in a unique and educational way.

Information Processing

The Solar Wiki app does not process any personal information from the user. The app uses the user's camera solely to provide an augmented reality experience and does not record or store images or videos captured by the user's camera.

Information Sharing

The Solar Wiki app does not share any personal information from the user. The app does not share information with third parties.

Information Security

The Solar Wiki app does not store any personal information from the user. The app is designed to provide information about the solar system and allow the user to view planets in augmented reality without collecting any user information.

Changes to the Privacy Policy

This Privacy Policy may be updated from time to time. Any changes to this policy will be reflected on this page and the date of the last update will be updated at the top of this page. If the user continues to use the Solar Wiki app after any changes to the Privacy Policy, it will indicate that the user accepts the changes.

Camera Permission

The Solar Wiki app requests permission to access the user's device camera, but only to view augmented reality content. The app does not record or store images or videos captured by the user's camera. All images that are displayed on the app screen are generated in real-time using augmented reality technology and are not stored or shared with third parties. The purpose of using the camera is to provide an immersive and interactive experience for the user, allowing them to explore the solar system in a unique and educational way.
